Good afternoon Kim,

Mr. Abilez and I connected directly this afternoon. Our Construction Account Manager for the area works closely with Adrian on a number of projects and has been doing his best to keep up with the increased demand.

I've asked him to keep the District Manager, John Muñoz, & I in the loop so we can ensure prompt service guarantees for current/future projects within City limits.

As for these current projects for Mr. Abilez - the District Manager will work to have the requests pulled for service Friday. Mr. Abilez now has my contact information in the case he may need assistance moving along the process with our construction account team members.

@Michael: The same offer is extended to you, your staff and any other builders you may work with.

Can I get an update as to whether this dumpster pick-up timeline was reduced? If so, has anyone contacted Mr. Abilez with KB?

Hello Kim,

I pray everyone had a blessed Easter weekend. Thank you very much for bringing this to my attention. I am already communicating with District Manager John Muñoz on this.

Please note that we are working to address and expedite the turn around for such projects in the City.

@Michael: Anytime you have concerns like this from the builders please feel free to loop in the Public Sector Customer Service Team (customersrvc@wm.com) and myself. We will work to move items along internally with the assistance of the local District Manager for Operations. I must ask that you keep the customersrvc@wm.com email confidential as it is exclusively for City staff use - hoping to not have it flooded by members of the public. All we'll need is the company name, address of project and any reference ticket numbers the builder may have received. Grid greatly helps us in tracking down the projects internally.

Chris,

See the note from WM below regarding having to wait 8 days for the swap of construction dumpsters. I think the 8 day period is a bit excessive given the number of homes that are under construction in the subdivision. Can you assist with a reasonable timeline?

Michael,
I wanted to see if you could please put some pressure on Waste Management to service our dumpsters a little faster. I sent in a request today, and the quickest they can get here is in 8 days.

Thanks,

Adrian Abilez
